GOING POSTAL!

RECENTLY MANY OF YOU HAVE TRIED TO SEND MAIL TO THE CHAPTER'S P.O. BOX ONLY TO HAVE THAT MAIL RETURNED BACK TO YOU.

THIS HAPPENED DUE TO A MISCOMMUNICATION BETWEEN THE CHAPTER AND THE UNITED STATES POSTAL SERVICE. WE APOLOGIZE FOR THE INCONVENIENCE, BUT THE ISSUE HAS BEEN RESOLVED.

YOU CAN ONCE AGAIN SEND ANY MAIL (SNAIL-MAIL) TO:
ROANOKE CHAPTER OF ASHRAE
P.O. Box 2155

PRESIDENT'S CORNER

"Maintain to Sustain – Delivering ASHRAE's Sustainability Promise" – Bill Harrison, ASHRAE President, 2008-2009

Last month Tom Watson was gracious enough to travel to Roanoke to be the guest speaker at our monthly meeting. Those of us that were present took advantage of the opportunity to hear and learn from, in my opinion, a leading expert in the world of refrigeration. The Roanoke Chapter cannot thank him enough for speaking last month.

This month's topic is focused on an area of HVAC&R system design that is often forgotten or given little attention to. Noise and vibration, if not given the proper attention, can ruin the best system design ever conceived.

Compared to the number of people involved in the HVAC&R industry, there are few that have a great understanding of this topic. A better understanding of noise and vibration leads to more consideration in the upfront system design and equipment selection/purchase. Upfront consideration makes it easier to please the customer, and is cheaper than having to go back and fix problem spots after the system is installed.

We are fortunate enough to have the President of BRD Noise and Vibration Control, Inc., Kris Kollevoll, as our speaker this month. Given the speaker's background, attendees at the meeting can expect to learn a thing or two about how to keep building occupants happy.

ASHRAE PUBLISHES RESIDENTIAL IAQ GUIDELINE

ATLANTA – A new residential ventilation and indoor air quality (IAQ) guideline is now available from ASHRAE.

ASHRAE Guideline 24-2008, *Ventilation and Indoor Air Quality in Low-Rise Residential Buildings*, is the companion guideline to ANSI/ASHRAE Standard 62.2-2007, *Ventilation and Acceptable Indoor Air Quality in Low-Rise Residential Buildings*, the only nationally recognized ventilation and IAQ standard developed solely for residences. Guideline 24 provides information on achieving good IAQ that goes beyond the requirements contained in Standard 62.2 by providing explanatory and educational material not included in the code-intended standard.

The guideline, which was written by the committee responsible for maintaining Standard 62.2, includes information on envelope and system design, material selection, commissioning and installation, and operation and maintenance.

Committee chair Steven Emmerich said, "While Standard 62.2 contains the essential minimum requirements that all low-rise residential buildings should meet to achieve acceptable IAQ, Guideline 24 is an essential resource for designers, builders and others looking for reliable information on topics not covered in the standard or seeking to go beyond minimum for high performance construction. Topics covered range from fundamentals of building airflow to humidity control to verification of equipment performance."

The cost of Guideline 24-2008 is \$54 (\$43, ASHRAE members). To order, contact ASHRAE Customer Service at 1-800-527-4723 (United States and Canada) or 404-636-8400 (worldwide), fax 404-321-5478, or visit at www.ashrae.org/bookstore.
